

ROUND POND
Chesterville, Franklin Co.
U.S.G.S. Farmington, Me.

Fishes

Yellow perch

Physical Characteristics

Area - 17 acres

Temperatures

Maximum depth - 19 feet

Surface - 67°F.

17 feet - 48°F.

Principal fishery: None

Round Pond is a bog-type pond located near the Chesterville esker. The water is dark brown, and the shore line vegetation consists of leatherleaf and other bushes. Water temperatures and oxygen contents are good for trout, but the water is naturally very acid. There are no areas for trout spawning.

An experimental stocking of brook trout after the initial survey was unsuccessful, and no further stocking is recommended.

Surveyed - September, 1962

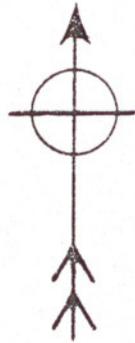

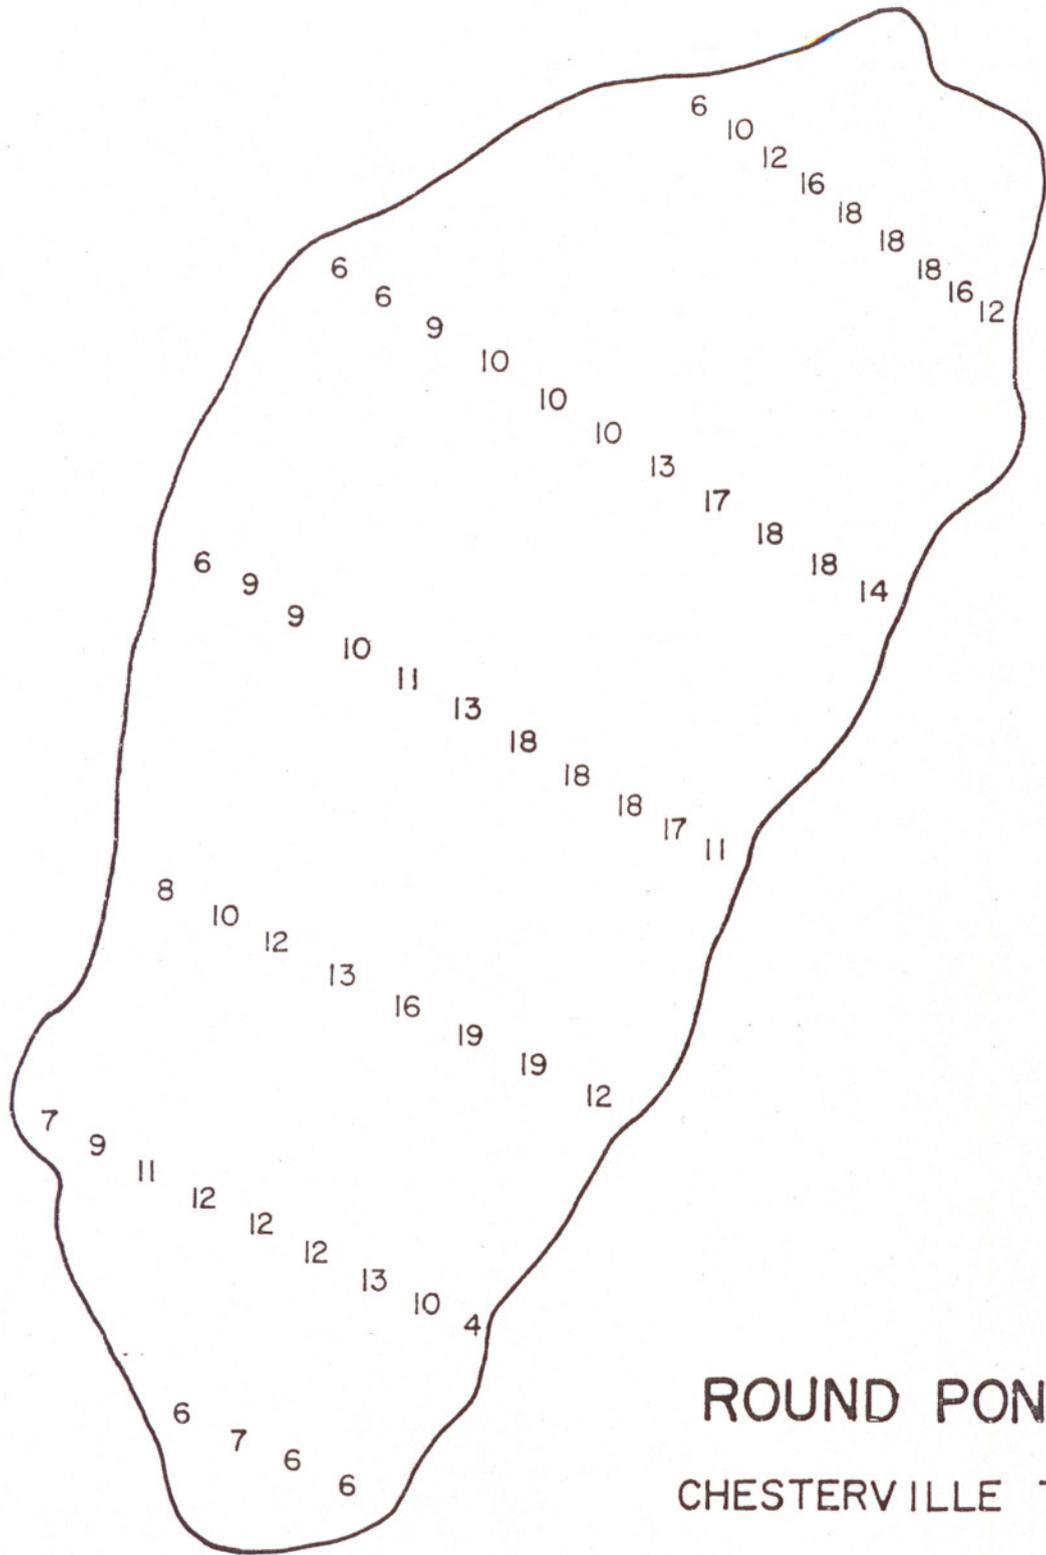

Resurveyed - 1963

(Revised - 1990)

Maine Department of Inland Fisheries and Wildlife
